Compatible with ink-based printers of any brand, designed to ensure quality and simplify troubleshooting.

CMYKRGB (Extended Gamut with Red, Green, and Blue)

Compatibility: Epson SureColor P7000 and P9000: Released in 2015, these printers feature a 10-color UltraChrome HDX ink set, including light black, light light black, orange, green, and violet inks, enabling superior color accuracy and smooth gradations.

Canon imagePROGRAF PRO-6000: Introduced in 2017, this 12-color large-format printer includes red, blue, and gray inks, enhancing color reproduction and achieving a wider color gamut.

HP DesignJet Z9+: Launched in 2018, this printer utilizes a 9-color ink system with chromatic red, green, and blue inks, reducing the need for light-colored inks and delivering high-quality prints with fewer inks.
